Mid-Level PHP Back-End Developer

About Me

PHP and Laravel

I have acquired solid knowledge in PHP and Laravel framework. I have completed several projects that demonstrate my proficiency in backend development using Laravel.
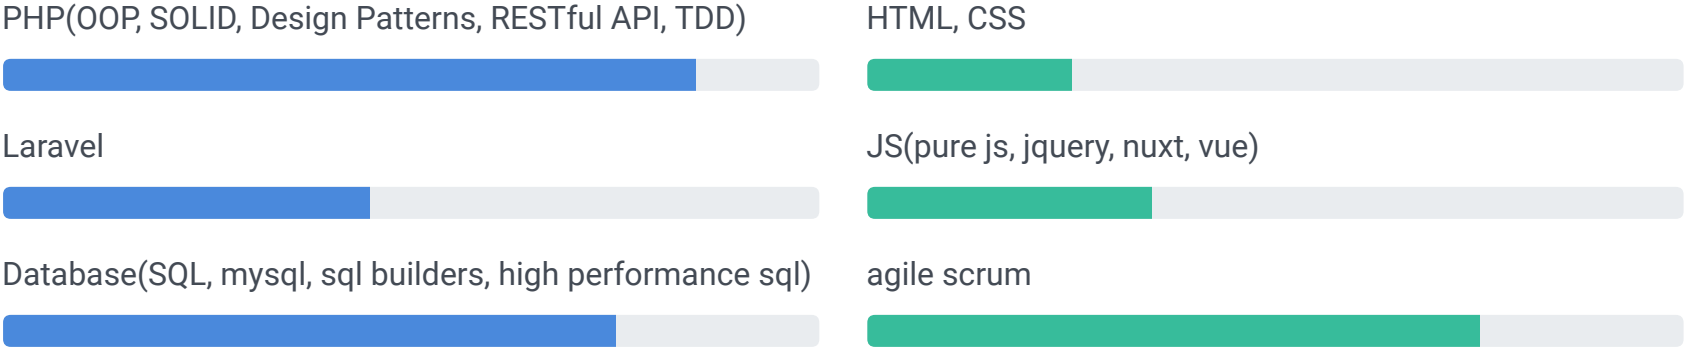

JavaScript

I am familiar with JavaScript and its usage in web development. I have worked on projects that involved client-side interactivity and functionality using JavaScript.

Frontend Development

While my main focus is backend development, I also have some experience with HTML and CSS for frontend development. I can work collaboratively with frontend developers to create well-rounded web applications.

Professional Skills

PHP(OOP, SOLID, Design Patterns, RESTful API, TDD)

Laravel

Database(SQL, mysql, sql builders, high performance sql)

HTML, CSS

JS(pure js, jquery, nuxt, vue)

agile scrum

Work Experience

Mid-Level PHP Back-End Developer iran tech company • Full-time
Apr 2021 – present

Technologies: PHP • JavaScript • SQL • Laravel • OOP (Object-Oriented Programming) During this job, I transformed into a proficient PHP back-end developer by learning object-oriented programming (OOP), the SOLID principles, design patterns, Laravel framework, SQL, high-performance databases, RESTful APIs, version control, and more. I achieved this growth through working on numerous projects.

jonior back end dev ponisha • Freelance
Mar 2020 – Apr 2021 • 1 yr 1 mo

Remote Technologies: PHP • Laravel • WordPress After learning the basics of back-end development, I began working as a freelancer and gained a lot of experience by completing multiple projects.

Education

Master of Science in Algorithm and Data Computing from Shahid Beheshti University (SBU)
2022 - Present

Pursuing a Master's degree in Algorithm and Data Computing at Shahid Beheshti University. Focusing on advanced algorithms, data analysis, and computational methods. Engaging in research projects to expand knowledge in the field.

Projects and contributions

Scrum - Contract and Employee Management App Back-end
php, laravel, js, nuxt, restfull-api

Made substantial contributions to "Scrum," the company's contract and employee management app, built with Laravel and Nuxt.js. Working closely with the development team, I participated in feature development, bug fixing, and code refactoring. By ensuring code quality and implementing efficient solutions, I contributed to the app's overall stability and performance. The app streamlined contract management processes and improved employee-related tasks, leading to enhanced organizational efficiency and a more productive work environment.

Company Tourism Framework Back-end
php, js, sql, html/css, ci/cd

Actively contributed to the development of the company's tourism framework, a sophisticated platform used to create multilingual websites for the tourism industry. Collaborating with the development team, I played a key role in implementing new features, optimizing code, and resolving critical issues. My efforts significantly improved the framework's capabilities, enabling the creation of dynamic and engaging websites, which positively impacted the company's reputation and customer satisfaction.

Purpose and Desired Work

Remote Work with Work Satisfaction
Current - Ongoing

Seeking a remote work opportunity that provides a collaborative and supportive environment. Striving to contribute my skills as a backend developer to create innovative solutions and deliver high-quality results.
Desiring a work arrangement where performance and client satisfaction are valued. Open to a work passport program or similar recognition, acknowledging successful completion of projects and client satisfaction.
